

Pratik Prajapati – Software Engineer & Devops

+1 (437) 449-7203 | prajapatipratik20@gmail.com | Canada | [LinkedIn](#) | [Github](#)

Accomplished Software Developer with over 7 years of experience in full-stack development, now expanding expertise into DevOps and focusing on Devops Engineer role. Demonstrates strong proficiency in CI/CD pipelines, Docker, Kubernetes, and AWS, with a focus on automating deployments and managing scalable infrastructure. Well-versed in tools such as Jenkins, GitHub Actions, and Terraform, supported by a solid backend development background. Committed to enhancing system efficiency, reliability, and team productivity through the implementation of DevOps best practices.

KEY SKILLS

Application Development | Backend Engineering | Deployment | Automation | Containerization | Configuration | Security Review | Programming | Automation Solutions| Project Management | Team Lead | Strong Communication | problem-solving skills | Decision-Making

TOOLS & TECHNOLOGIES

Scripting Languages: Shell Script (Bash), PHP, Python, Rest API | **Frontend:** React.js, Javascript | Backend: Laravel, Python | **Database Management System:** PostgreSQL, MYSQL, AWS DynamoDB | **Container Platform:** Docker | **Architecture:** Batch Processing, Event Driven, Microservices, Monolith | **Version Control:** Git, GitHub, Bigbucket | **Platform:** DevOps, AWS Services, Terraform, Ansible | **CI/CD Tools:** Jenkins, Gitlab | **Observability Tools :** Prometheus, Grafana

PROFESSIONAL EXPERIENCE

Lead Software Engineer Iflair Web Technologies	Ahmedabad, IN Sep 2019 – Nov 2023
Sr.PHP Developer Global Websoft	Ahmedabad, IN Sep 2015 – Jan 2019

Roles & Responsibilities :

- Led and managed a team of PHP developers, overseeing project planning, task allocation, and timely delivery of scalable, high-performance web applications.
- Collaborated cross-functionally with project managers, designers, and QA teams to define requirements, ensure code quality, and maintain adherence to industry best practices.
- Provided technical guidance, mentorship, and training to team members, fostering skill development and improving overall team productivity.
- Supervised deployment processes, version control, and continuous integration workflows while ensuring application security and performance optimization.

KEY PROJECTS EXECUTED - Development

- Project : Personalized Coaching & Development Platform**
 - Programmed a structured platform that empowers individuals to identify and track their personal growth, while enabling coaches to guide, engage, and monitor progress through personalized profiling and actionable analytics
 - Developed and maintained robust server-side logic using PHP programming , including API integrations and efficient data handling.While building a custom web application now used by over 300 active users and groups.
 - Structured a database using migration file and seeded initial data to establish consistent and scalable foundation
 - The platform enabled over 300+ users to actively track and accelerate their personal growth, increasing engagement by 30% within six months. It also empowered coaches to effectively guide and retain clients, boosting retention rates by 40% through personalized profiling and real-time analytics.

2. **Project : Enhance & Maintain a Project Management & Real Time Communication Platform**

- In this project, the team faced challenges with real-time communication across multiple platforms. They are continuing to focus on improving and optimizing this functionality to ensure seamless cross-platform collaboration
- Launched a real-time messaging feature using WebSocket technology, enabling instant cross-platform communication for 250+ users within a 3-week sprint.
- The WebSocket-based messaging system improved user response time by 70%, supported 250+ concurrent users, and achieved 99.9% message delivery within 1 second.

KEY PROJECTS EXECUTED - Devops

1. **Project: A Real-time scalable application CI/CD pipeline on Jenkins with Github Action**

Key Achievement: Successful executed end-to-end project related to integration and system design to server and orchestration using docker, reactJS and streamline devops process.

2. **Project: Deployed ECommerce Application**

Key Achievement: Efficiently created a local Kubernetes (Kind) cluster and deployed a full-stack E-commerce application with MongoDB on an AWS EC2 instance, configuring an Ingress controller for secure domain-based access, while implementing auto-scaling, auto-healing, persistent volume management, and seamless database migration to ensure high availability and fault tolerance.

3. **Project: Created multi environment infrastructure on AWS**

Key Achievement: Successfully designed and maintained scalable cloud infrastructure (Multi Environment: Production, Staging, Development) on AWS using Terraform state management with S3 as a remote backend and DynamoDB for state locking—ensuring secure, scalable, and consistent deployments across environments.

EDUCATION

- **Master of Computer Application – MCA** | Ignou University | Dec 2014 | India
- **Post-graduation diploma in computer application – PGDCA** | IGNOU University | Apr 2011 | India
- **Bachelor of Computer Application – BCA** | Gujarat University | Apr 2010 | India
